Subject index

A

accelerated longitudinal design 240
adjusted means 36
age-period-cohort 239
agreement 82
AIC . . . *see* Akaike information criterion
Akaike information criterion 323
analysis of covariance 35
analysis of variance 17–19, 262–264
ANCOVA . . . . . *see* analysis of covariance
Anderson–Hsiao estimator 274
ANOVA . . . . . *see* analysis of variance
antedependence model 272
applications
  adolescent-alcohol-use data . . . 335, 380
  airline cost data 461
  anorexia data 61
  antisocial-behavior data . . 283, 333
  army data 219
  children's growth data 343, 377
  cigarette-consumption data . . . 336, 467
  class-attendance data 63
  cognitive-style data 289
  crop data 178
  dairy-cow data 426
  dialyzer data 220
  diffusion-of-innovations data . . . 378
  essay-grading data 118
  exam-and-coursework data 427
  faculty salary data 11
  family-birthweight data 220
  fat accretion data 379
  Fife school data 443, 460
  general-health-questionnaire data 116
applications, *continued*
  Georgian birthweight data 119, 175, 179
  grade-point-average data 173
  growth in math data 376
  Grunfeld investment data 434
  head-size data 118
  high-school-and-beyond data . . . 60, 176, 217
  homework data 218
  hours-worked data 287
  inner-London schools data 181, 216
  instructional-improvement data 420
  jaw-growth data 174, 377
  Kenyan nutrition data 399
  math-achievement data 419
  multicenter hypertension-trial data 422
  neighborhood-effects data 117, 172, 463
  nitrogen data 464
  olympic skating data 465
  peak-expiratory-flow data 74, 116, 386, 430, 431
  postnatal data 334
  rat-pups data 174
  returns-to-schooling 290
  school-effects data 423
  sex education data 177
  smoking and birthweight data . . 61, 123, 467
  STAR data 424, 425, 468
  tax-preparer data 283
  teacher expectancy meta-analysis data 120

applications, *continued*
twin-neuroticism data 117, 429
unemployment-claims data ... 284, 286, 381
U.S. production data 421, 461
video-ratings data 462
wage-panel data 175, 229, 247, 298
wheat and moisture data 218
Arellano–Bond estimator 276
atomistic fallacy 1, 150
attrition 278
autocorrelations 244
autoregressive-response model 269–272
autoregressive structure 308–311

B
balanced data 233, 295
banded structure 313–315
Bayesian information criterion 323
best linear unbiased predictor 111, 441
between estimator 143–144
BIC ..... *see* Bayesian information criterion
bivariate linear regression model ... 339
bivariate normal distribution .. 190, 191
BLUP ..... *see* best linear unbiased predictor
Breusch–Pagan test 89

C
caterpillar plot 208
causal effect 57
clinical trial 5
clustered data 73, 385
cluster-randomized trials ... 4, 171, 177
coefficient of determination 22, 134–137
cohort-sequential design 240
commands
`anova` 19
`dropemptycells` option 263
`repeated()` option 264
commands, *continued*
`by` 471
`sort` option 270
`correlate` 186, 243
`covariance` option 186
`egen` 444, 449, 471
`count()` function 127, 185
`group()` function 449
`mean()` function 154, 237
`rank()` function 236
`sd()` function 426
`tag()` function 126, 444
`total()` function 444
`encode` 387
`estat recovariance` 197
`estimates stats` 323
`estimates table` 324
`foreach` 154
`generate` 75
`gllapred` 209
`graph combine` 205
`gsort` 208
`hausman` 157
`histogram` 13, 161
`normal` option 55, 205
`keep` 231
`lincom` 39, 41, 45, 154
`lrtest` 89, 140, 452
`manova` 264
`margins` 19, 35, 140, 141
`marginsplot` 141
`merge` 185, 472
`metaan` 121
`fe` option 121
`ml` option 121
`misstable` 366
`mkspline` 355
`predict` 26, 202, 203, 395
`fitted` option 203, 351, 415
`reffects` option .. 112, 161, 202, 395, 413, 441
`reses` option 114, 161
`rstandard` option .. 55, 161, 207
`xb` option 26, 107, 182, 417

commands, *continued*
qnorm 454
quietly 35
rcap 209
recode 387
regress 23, 84, 166, 176, 182
beta option 25
noconstant option 107
vce() option 176
vce(cluster *clustvar*) option 166
vce(robust) option 29, 56
reshape 83, 230, 243, 371, 387, 472
i() option 83, 231, 387
j() option 83, 231
string option 289, 387
sem 366
means() option 369
method(mlmv) option 368
noconstant option 368
set seed 279
ssc 457
statsby 185, 200, 472
summarize 186
supclust 457
svyset 95
tabstat 12, 243
tabulate 42, 446
generate() option 42
test 252
testparm 46, 47, 139, 156
ttest 15
unequal option 16, 29
twoway
by() option 174
connect(ascending) option 174, 187, 238
ysize() option 209
twoway function 39, 199
twoway histogram
horizontal option 205
use 75
clear option 12, 75
xtdescribe 233, 372, 400, 472
commands, *continued*
xtgee 326
corr(ar 1) option 326
vce(robust) option 326
xtgls 329, 338
igls option 166, 329
xthtaylor 253, 256
amacurdy option 255, 291
endog() option 256
xtmixed 85, 196, 249, 265, 299, 307, 316, 393–395, 437
covariance() option 299
covariance(exchangeable) option 431
covariance(identity) option 431
covariance(unstructured) option 196, 307, 410, 431
emiterate() option . . . 166, 214
emonly option 166, 214
estmetric option 112, 350, 440
matlog option 198
matsqrt option 197
mle option 82, 86, 133, 194, 265, 299
noconstant option 86, 299, 309, 316, 362, 431
nofetable option 299
nogroup option 299
reml option 83, 166, 197
residuals() option . . . 299, 373
residuals(ar 1, t()) option 309, 316
residuals(ar(1), t() by()) option 321
residuals(banded 1, t()) option 313
residuals(exchangeable) option 304
residuals(exponential, t()) option 311
residuals(independent, by()) option . . . 317, 319, 360, 373

commands, `xtgee`, *continued*
`residuals(ma 1, t())` option . . . 312
`residuals(toeplitz 2, t())` option . . . 315
`residuals(unstructured, t())` option . . . 299
`technique()` option . . . 166
`variance` option . . . 86, 93, 196, 301, 394
`vce(robust)` option . . . 88, 134, 163, 197, 251, 252, 325, 327
`xtpcse` . . . 330, 337
`correlation(ar1)` option . . 331, 337
`correlation(independent)` option . . . 337
`independent` option . . . 337
`nmk` option . . . 337
`xtreg` . . . 84, 143, 259
`be` option . . . 143
`fe` option . . . 92, 104, 146, 259, 288
`mle` option . . . 82, 84, 104
`noconstant` option . . . 280
`pa` option . . . 327
`re` option . . 83, 89, 148, 166, 261
`vce(robust)` option . . . 88, 327
`xtset` . . . 84, 232, 286
`xtsum` . . . 125, 401, 472
`xttab` . . . 127, 235
`xttest0` . . . 90
comparative standard error . . . 114
complex level-1 variation . . . 360
compositional effect . . . 151, 171
compound symmetric structure . . . 304
compound symmetry . . . 264, 304
conditional independence . . . 79
confidence interval . . 16, 87–93, 140–142
confounder . . . 30
consistent estimator . . . 100
contextual effect . . . 151, 171
contrast . . . 140
covariance structure . . . 100, 293–322, 437
covariate . . . 35
cross-classification . . . 433, 443
cross-level interaction . . . 211, 359
cross-over trial . . . 6
cross-sectional time-series data . . . 227
crossed random effects . . . 433–470

D
datasets . . . *see* applications
diagnostic standard error . . . 114
diagnostics . . . 160–163, 453–455
difference-in-difference estimator . . . 286
directed acyclic graph . . . 78
double differencing . . . 268
dropout . . . 278
dummy variable . . . 27–29, 42–48
dynamic model . . . 228, 269–272

E
EB . . . *see* empirical Bayes
ecological fallacy . . . 1, 150
effect modifier . . . *see* interaction
efficiency . . . 100
elasticity . . . 338
EM algorithm . . . 165
empirical Bayes . . . 109–113, 159–161, 201–204, 351, 371, 394–395, 413, 441, 453
borrowing strength . . . 111
standard errors . . . 113–115
endogeneity . . . 129, 149–158, 250–258, 274
error components . . . 79–80
estimated best linear unbiased predictor . . . 111
examples . . . *see* applications
exchangeable . . . 96
exchangeable structure . . . 304
exogeneity . . . 57, 129
exponential structure . . . 308–311

F
factor . . . 35, 95
factor variables . . 35, 40, 45, 50, 51, 53, 99, 107, 211

family study 5
feasible generalized least squares . . 148, 164
FGLS . . . . . *see* feasible generalized least squares
fixed effects 95–97, 158–160
fixed-effects estimator 145–147
fixed-effects model . . . 146, 228, 257–262
functions
  `rnormal()` 279
  `runiform()` 279

G

generalizability
  coefficient 463
  theory 463
generalized least squares 164
`gllamm` . . . . . *see* commands
GLS . . . . . *see* generalized least squares
growth-curve model 343–382

H

Hausman–Taylor estimator 253–257
Hausman test 157, 253–257, 291
Hessian 165
heteroskedasticity 20, 191, 317–321, 360–363
hierarchical data 385
hierarchical model 93
higher-level model 385–431
higher-order polynomials 54
homoskedasticity 20
hypothesis test 12–17, 87–93, 138–140, 142, 197, 322, 396, 451–453

I

identification 214–215
independence structure 297
independent-samples t test 12–17
indicator variable . . *see* dummy variable
information matrix 165
initial-conditions problem 273
instrumental variable 156, 253, 254, 274
interaction 36–42, 48–51
intercept 20
intervening variable 48
intraclass correlation 80, 130, 192, 392–393, 436, 448–449
iterative generalized least squares . . 165

L

lagged-response model 269–272
latent trajectory model . . . . . *see* growth-curve model
latent variable 364
likelihood-ratio test 88–89, 140
linear mixed (effects) model 128
linear projection 56
linear random-intercept model with covariates 128
long form 83, 230–232
long panel 327–331
longitudinal correlations 244
longitudinal data 227, 247–291, 343–382
longitudinal model 1–7
longitudinal study 5–6

M

MANOVA . . . *see* multivariate analysis of variance
MAR . . . . . *see* missing at random
marginal
  likelihood 101
  model 229, 293–342
maximum likelihood 101, 165
mean squared error of prediction . . . 114
mean structure 293
measurement error 78
measurement model 78
measurement study . . 6, 74–75, 386–387
mediator . . . . . *see* intervening variable
meta-analysis 4–5
missing
  at random 278
  data 233–234, 278–282
mixed model 128
mixed-effects model 85

ML . . . . . *see* maximum likelihood
model-based estimator 29
model sum of squares 17
moderator . . . . . *see* interaction
moving-average structure 311–312
multilevel model 1–7
multiple linear regression 30–36
multiple membership model . . . 460, 470
multisite studies 171
multistage survey 3–4
multivariate
    analysis of variance 264
    multilevel model 427
    regression model 303
    response 364

N

nested random effects 385–431
Newton–Raphson algorithm 165
NMAR . . . . . *see* not missing at random
normal assumption 129
normality assumption 14, 101, 190, 248, 298
not missing at random 279

O

OLS . . . . . *see* ordinary least squares
one-way ANOVA 17–19
ordinary least squares 17, 167
overparameterized 20

P

panel data . . . . . *see* longitudinal data
path diagram . . . 78, 254, 308, 311, 366, 391, 430
piecewise linear model 353–358
polynomial 52–54, 345–346
pooled OLS 164, 241–242
posterior
    distribution 109
    variance 113
power 168–171
prediction . . . . . *see* empirical Bayes
predictive margin 36
prior distribution 109

R

random
    effects 95–97, 158–163
    interaction 452
    intercept 78
random-coefficient model 188–194
random-effects model 228
random-intercept model 127–131
reduced form 210, 358
reference group 28
regression coefficient 20
regression sum of squares . . . . *see* model sum of squares
reliability 80
REML . . . . . *see* restricted maximum likelihood
repeated measures . . . . . *see* longitudinal data, 227
residual sum of squares . . . . . *see* sum of squared errors
residuals 54–56, 160–163, 204–207, 413–417, 453–455
restricted maximum likelihood 102, 166
robust standard error 29, 56, 88, 100, 104–105, 134, 138, 163, 168, 197, 242, 244, 251, 262, 326
R-squared . . . . . *see* coefficient of determination

S

sample-size determination 168–171
sandwich estimator . . . 29, 88, 104, 242, 326
scalars 350
scatterplot 182
score test 89
seemingly unrelated regression 303, 339
SEM . . . . . *see* structural equation model
serial correlations 244
short panel 327–331
shrinkage 111, 202
simple linear regression 19–27

simulation 279–282
slope 20
small-area estimation 178
spaghetti plot 187
sphericity 264
spline 353
split-plot design 264
SSC 457
standardized regression coefficient . . . 25
state dependence 273
string variable 387
structural equation model 364–366
sum of squared errors 17

T
three-level model 389–417
three-stage formulation 405–406
three-way interaction 42
time scales 239–241
time-series operators 274
time-series–cross-sectional data . . . 327–331
time-varying covariates 234–235
Toeplitz structure 313–315
total sum of squares 17
trellis graph 183, 352
t test . . . *see* independent-samples *t* test
twin study 5
two-level model 78
two-stage formulation 210, 358
two-way error-components model . . 433, 435–442
two-way interactions 42

U
unconditional model 136
unstructured covariance matrix . . . 298–303

V
variance components 79–82

W
Wald test 138–139, 156
wide form 83, 230–232
within estimator 145–147

X
`xtmelogit` . . . . . *see* commands
`xtmepoisson` . . . . . *see* commands
`xtmixed` . . . . . *see* commands
`xtreg` . . . . . *see* commands
