

Subject index

Symbols

- 1PL model...see one-parameter logistic model
- 2PL model .. see two-parameter logistic model
- 3PL model.....see three-parameter logistic model

A

- ability estimate.. 63, 126, 144, 145, 157
- ability level..... 43, 64, 69, 75, 76, 109–115, 119, 121, 123–127, 129, 137, 138, 140, 145, 150, 152, 211, 212
- AIC... see Akaike information criterion
- Akaike information criterion... 99–100, 103, 109, 220, 221, 250

B

- Bayesian information criterion 99–100, 103, 109, 220, 221, 250
- BCC see boundary characteristic curve
- Benjamini–Hochberg procedure ... 169, 173, 175, 179–181
- Bernoulli sampling model..... 54
- BH procedure see Benjamini–Hochberg procedure
- BIC see Bayesian information criterion
- binary items 85, 137–138, 185, 226
- boundary characteristic curve.. 214–216

C

- category characteristic curve 187, 210, 216
- CCC .. see category characteristic curve

CDF.....see cumulative distribution function

- CI see confidence interval
- classical test theory 6, 7, 31–42
- conditional independence..... 41, 62
- conditional uncorrelatedness 41
- confidence intervals.. 124, 125, 144, 206
- congeneric test model 33, 37
- construct ... 3, 109–114, 137, 165, 176, 189
- construct validity 109, 164
- content validity 164, 237
- criterion validity..... 164
- criterion-referenced test..... 158, 163
- CTM.....see congeneric test model
- CTT see classical test theory
- cumulative distribution function..... 9, 13, 17

D

- density curve 10
- DIF... see differential item functioning
- difference model 212, 216
- differential item function 167–182
- discrete items 7, 54, 132

E

- EM algorithm see expectation-maximization algorithm
- error score 31–34
- expectation-maximization algorithm... 130

F

- FA see factor analysis
- factor analysis..... xviii, 6–7, 31–42, 51–54, 58, 59, 76–79, 110, 145

FIML see full information maximum likelihood
 full information maximum likelihood 132

G

general linear model . . . 38, 44–45, 63–65
 generalized linear model . . . 6, 8, 44–47, 51–54, 79, 240, 244, 246
 generalized partial credit model . . . 206–211, 221, 227
 GLIM see generalized linear model
 goodness of fit 92
 GPCM see generalized partial credit model
 graded response model . . . 211–221, 224, 225

H

homogeneity . . . 52, 57, 61, 165, 237, 243
 hybrid models 2, 56, 185–236

I

ICC see item characteristic curve
 information function 123, 125, 127, 137–166, 198
 information matrix 123, 128
 instrument 3, 4
 invertibility 20–24
 IRM see item response modeling
 IRT see item response theory
 item calibration 122, 164
 item characteristic curve 1, 2, 5, 9, 29, 95, 135, 140, 169, 170, 176, 186, 187, 195, 214
 item characteristic function 1
 item difficulty 82, 104
 item discrimination 71, 72, 79, 92, 131, 135, 139, 142, 195, 210
 item response function 1
 item response model xvii, 2, 5, 43, 48, 56, 58, 61, 63–65, 69, 76, 87–117, 119–135, 155, 220–225, 253
 item trace curve 1

J

joint probability 61, 62

L

latent trait 1, 36, 37, 43, 44, 55, 60, 61, 76, 77, 80, 148, 150, 154, 170
 latent variable xvii, 3, 6, 31, 38, 41, 43, 44, 56, 61, 62, 84–85, 129, 169, 170, 237–239
 latent variable modeling . . xvii, 6, 7, 51, 61, 84–85
 LI see local independence
 likelihood function . . . 120–127, 129, 130
 likelihood-ratio test . . 98, 102, 105, 131, 134, 171, 175, 177, 243, 249
 local independence . . 41, 44, 57–62, 120, 127, 129, 143
 log odds 21, 82
 logistic distribution 16, 17
 logistic function . . . 9, 15–24, 26–29, 46, 65–67
 logistic ogive 20, 25
 logistic regression 8, 43–54, 77–79, 119, 170, 171, 188, 211
 logit 20–24, 26, 46, 47, 64, 79, 82, 241, 242
 logit function 21, 22, 26, 79
 logit link see logit
 logit link function see logit
 LR see logistic regression
 LRT see likelihood-ratio test
 LVM see latent variable modeling

M

Mantel–Haenszel test 170, 173
 MAR see missing at random
 marginal maximum likelihood 122, 128, 130, 131
 maximum likelihood 46, 49, 254
 measuring instrument 159–164
 MH test see Mantel–Haenszel test
 MIRT see multidimensional item response theory

misconceptions about classical test theory 31, 33–36
 misconceptions about classical test theory 33
 missing at random 132, 254
 missing completely at random 132
 missing data 132–135, 253, 254
 ML see maximum likelihood
 MML see marginal maximum likelihood
 monotonicity 19
 MTP see multiple testing procedure
 multidimensional item response theory 4, 42, 43, 85, 237–251
 multiple testing procedure 173, 179
 multivariate logistic regression 69

N

NC score see number correct score
 nested model 97, 98, 131
 nominal response model 187–198, 219–221, 227
 nonlinear factor analysis .. xviii, 43–54, 79, 145
 normal distribution ... 9–15, 18, 19, 126
 normal ogive ... 7, 9–16, 19, 20, 24–29, 83, 87
 normal ogive curve 13, 15
 normal ogive function 13–15, 24–29
 normal ogive functions 9
 NRM see nominal response model
 number correct score 63, 169

O

observed score 4, 5, 31–33, 36, 58, 120, 125, 148, 170
 one-parameter logistic model 77–79, 97, 100–106, 109, 131, 134–135, 142, 174

P

parallel test 33, 37
 partial credit model 199–202, 221, 227, 228

PDF ... see probability density function
 polytomous item 185–236
 probability density function .. 9–13, 15, 17, 18, 126
 probit analysis 9
 probit function 15, 26
 probit model 9
 pseudoguessing parameter 83, 84, 106, 109, 131, 138, 139, 230, 231, 233, 236

R

random variables 3, 9, 17, 57, 58
 Rasch model ... 69, 78–82, 98, 102, 104, 109, 112, 187, 189, 199
 rating scale model .. 202–206, 220, 221, 227
 regularity conditions 124
 RSM see rating scale model
 RV see random variable

S

S-shape curve 2
 scale of measurement 75–76
 standard error of estimation 144
 statistical independence 57, 58, 60

T

TCC see test characteristic curve
 test bias 167
 test characteristic curve .. 135, 137–154, 217
 theta 66
 three-parameter logistic model 82–84, 106–109, 121–123, 131, 138, 230–236
 TIF see test information function
 true score 31–37
 true-score equivalent 37
 two-parameter logistic model 68–79, 91–97, 100–106, 109, 116, 121, 131, 135, 142, 174, 187–189, 212, 235
