Symbols

`#delimit` command 289

A

`alpha` 2
`alpha` command 7
`alpha` formula 2
asymptotically distribution free estimator 15
auxiliary variables 83–84

B

`bmiworking.dta` 160, 168

C

case
 change variable name case 273
casewise deletion 10
`center` command 189
centering 189
CFA ... see confirmatory factor analysis
CFI see comparative fit index
`chi2tail()` option 180
`clonevar` command 14
`codebook, compact` command 4
comparative fit index 23
comparisons of models 227
composite latent variables 117,
 141–150
confirmatory factor analysis
 advantages 14
 estimation of two-factor model
 37–45
 interpreting results 17–20, 33
 `sem` command 14

constraints 101–103
 equality 129–131
 fixed error variance 143, 146
conventions xxiv–xxv
correlated errors 72–83, 125
 growth curves 180
 spurious effects 125
correlated residuals 72–83
correlation comparisons 238–240
covariance comparisons 238–240
covariates 80–83
cross-lagged panel design 86–89
cumulative disadvantage 156

D

`data` xxii–xxiii
 entering correlations, means, and
 standard deviations .. 287–296
 entering summary statistics ... 289
defaults
 restoring SEM Builder defaults
 285
degrees of freedom ... 21, 24, 34, 43–44,
 71, 73, 75, 83, 157, 172, 243
direct effects 60–65
 testing 73–80
`display chi2tail()` command ... 138,
 180
`display` command 5
do-files xxiii
drawing 269–285
